Hawker Pacific Demonstrates King Air 350i Around Australia

Leading aircraft sales, services and product support company, Hawker Pacific, has begun a two-week demonstration tour around Australia of the King Air 350i - the flagship aircraft of the Hawker Beechcraft King Air turboprop range.

The tour, which follows on from an extremely successful demonstration tour across Asia, will travel through Cairns, Brisbane, Sydney, Melbourne, Adelaide and Perth.

The King Air 350i, the world's undisputed leader in business turboprops, has earned an envied reputation amongst pilots and owners for its practicality, reliability and outstanding efficiency.

Hawker Pacific's Senior Vice President, Aircraft Sales & Flight Services Group, Tony Jones said: "We decided to further showcase the aircraft following the high level of interest shown by special mission clients, private individuals, corporate and charter operators when we displayed the aircraft at this year's Avalon airshow. This demonstration tour is an indication of our continued commitment to the Australian aviation market and to the Hawker Beechcraft extensive aircraft range we support."

"The 350i's mission flexibility and operating efficiency, combined with an extraordinary new interior, has generated tremendous response across Asia. It is sleek, stylish, highly capable and a joy to fly. And as the greenest aircraft in its class, it's the responsible choice the market has been looking for. We look forward to showcasing this aircraft's capability and comfort throughout Australia," he added.

At each venue, private operators, special mission representatives and corporate clients will be invited to meet the Hawker Pacific team, view the aircraft and look at the range of finance packages available.

Notes to editors

1. **Hawker Pacific** is a market leader in integrated civil and military aerospace sales and product support in South East Asia, Australia, the Pacific and the Middle East and is one of the largest independent companies of its type in the region with nearly 600 employees. The company's Asian operations include established businesses in Singapore, China, the Philippines, Thailand, Indonesia and Malaysia.

Hawker Pacific represents some of the world's leading aircraft manufacturers, including Hawker Beechcraft Corporation, Bell Helicopter and Diamond Aircraft.

Hawker Pacific is also a primary dealer in used aircraft with networks to source, acquire and trade aircraft globally.

Hawker Pacific is also Australia's premier fixed base operator (FBO) with a network of facilities in Sydney, Brisbane, Cairns, Singapore, Perth, Shanghai and Malaysia. The company's FBOs offer VIP services and crew facilities, 24/7 on demand aircraft charter from a modern aircraft fleet, flight operations and total aircraft management.

Hawker Pacific's product support activities include MRO, structural modification and support services to a wide range of fixed and rotary wing aircraft for corporate, charter, defence and special mission operators throughout the region. Other services include aircraft and engine maintenance, repair and overhaul, special mission aircraft modifications, design engineering, avionics parts and service, plus the provision of spare parts, exchange rotables and equipment sales.

Hawker Pacific holds the highest certification levels and accreditations including CASA, EASA and FAA certification, ISO 9001 Bureau Veritas accreditation, plus OEM customer / airworthiness approvals by 26 major global suppliers and civil and military regulatory authorities. These set the company apart from most others operating in the region, giving it a capacity to deliver complex special mission modifications for both civil and military customers.

The company's customers include airlines, commuter, corporate, general aviation, rotary wing and special mission operators, governments and the military.

2. **King Air 350i** - As the segment's greenest business aircraft, the King Air 350i has unmatched fuel efficiency and low operating costs. With class-leading capabilities and efficiency, the next-generation King Air 350i is the responsible, sustainable alternative that business aviation has been waiting for. As its segment's greenest aircraft, the King Air 350i can take more passengers farther on less fuel for consistent savings for your business. Plus, state-of-the-art design and performance enhancements represent new heights of power and durability.

The King Air 350i's new interior is the most comfortable and capable cabin ever offered in its class. The 350i's revolutionary Flexcabin™ system can be reconfigured for work or play, while the new Venue™ Cabin Management System makes flying more productive, entertaining and relaxing.

Whether you're traveling to major airports or unimproved airstrips, the versatility and comfort of the King Air 350i will show you why pilots, companies and governments in 105 countries have trusted more than 6,500 King Airs over the years – more than any other business aircraft.
