

AEROMEDICAL SOLUTIONS

Hawker Pacific's Aeromedical solutions are world class, developed from decades of providing lightweight, customised special mission aircraft solutions to government and civil customers throughout Australia, and the Asia Pacific region.

The range of customised installations have included (but are not limited to):

- Cabin reconfigurations with multiple cabin seating and stretcher options
- Dedicated medical power systems
- Integrated oxygen and suction systems
- Cabin intercom systems
- Mission radios
- LED lighting for patient and loading areas
- Purpose built equipment stowage cabinets and cargo nets
- Heavy duty floor systems
- Avionics equipment upgrades
- Airframe performance enhancements
- Emergency safety equipment

Hawker Pacific's integrated project management capability delivers turn-key aviation solutions on time, and within budget.
