

## IN SERVICE SUPPORT

Hawker Pacific Technologies provides complete fleet in-service engineering support ensuring customer capabilities are seamlessly maintained.

Currently holding Authorised Engineering Organisation (AEO) status for ADF Military registered aircraft and civilian regulatory certification capabilities (including CASA Part 21.M, and CAA NZ Part 146) the following operators are supported:

- RAAF B300 fleet (32SQN & 38SQN)
- RNZAF B200 (42SQN)
- DSTO B1900 Defence Experimental Airborne Platform (DEAP)

Previous Design Approved Contractor (DAC) support capabilities have included:

- RAA B300 fleet (173SQN)
- RAAF Falcon 900 VIP fleet
- RAAF P-3 Orion
- RAAF DHC-4 Caribou fleet

Hawker Pacific Technologies is also able to provide customised special mission aircraft modifications to fulfil specific customer capability requirements for surveillance, aeromedical, aerial survey, training, utility, and transport roles.

Our Company-wide integrated project management delivers turn-key aviation solutions on time, and within budget.

Royal Australian Air Force 32SQN, B300 King Air Navigational Trainer Aircraft

Royal New Zealand Air Force 42SQN, B200 King Air Interim Advanced Pilot Training

Defence Science & Technology Organisation, B1900 Defence Experimental Airborne Platform
